

Device & Component Business

We provide PCs, SBCs, interface boards and network-related products necessary for All Automation (AA) applications.

■ IPC Products

We guarantee the long-term supply of industrial PCs that are designed to meet All Automation needs. These IPC's are produced using environmentally conscious manufacturing methods.

- ▶ Panel-PCs
- ▶ Flat Panel Display
- ▶ BOX-PCs
- ▶ Silicon disk drive

■ Industrial Automation products

We offer a wide variety of products that enable the configuration of easy-to-use, low-cost All Automation. These include PC interface boards, wire-saving, and other peripheral equipment, as well as a variety of package software.

- ▶ PCI I/F BOARD
- ▶ I/O Extension Unit
- ▶ ISA I/F BOARD
- ▶ REMOTE I/O
- ▶ F&IT
- ▶ Support Software
- ▶ PC Card

Solution Business & Service

In an effort to meet the ever-diversifying customer demand in our System and Solution business, we take advantage of our strength in Device and Component products to provide optimized system integration, incorporating both hardware and software.

■ Solution products

We provide setup service for solution PCs and controllers, customized to the customer's request. Our services also include software installation as well as the development and supply of related equipment.

- ▶ F&E Web Server
- ▶ System equipment
- ▶ Set-up PCs
- ▶ Terminal units

CONTEC is a global corporation, operating primarily in the fields of electronics and information related technologies. Always acting from the customer's viewpoint, we take up new challenges in a wide range of All Automation (AA) operations utilizing personal computers. We provide an extensive lineup of value-add devices and components, as well as customer-orientated systems and solutions featuring microcomputers, personal computers and communication.

- We are the pioneers who brought the personal computer's ease of operation to the field of automation technology.
- Quick to embrace international quality standards, we obtained ISO9001 certification in 1995. We strive to earn our customer's trust and bring them satisfaction through unmatched quality management.
- We offer continuous support - before, during and after installation - from the provision of technological and application information to maintenance support seminars.
