- A-02 Box PC
- A-11 Panel PC
- A-18 Flat Panel Display
- A-22 Silicon Disk Drive
- A-24 Box PC with Windows CE
- A-26 Panel PC with Windows CE

### Panel PC

The Panel-PC is designed for your specifications and with changing technology in mind. Together with the fan-less CPU and power supply, it increases the MTBF and reliability of the system.

### Flat Panel Display

Thinness and figure allow the units to be easily mounted on doors of control panels or incorporated into OEM equipment.

### Box PC

Fanless operation together with a watchdog-timer, alarm outputs and remote reset makes it the ultimate reliable industrial PC for years of uninterrupted service in your critical applications.

### Silicon Disk Drive

Our new 2.5 and 3.5-inch Silicon Disk Drives are ideal for use in a growing number of industrial and emerging applications that require high shock resistance and low power consumption.
